

Investment Analyst | The Community Outcomes Fund Brooklyn, New York

The Community Outcomes Fund

In communities across the country, social challenges persist while resources remain stagnant or may decline. Today, more than ever, governments must find ways to smartly spend scarce dollars. Outcomes financing has emerged as a promising way for local governments to fund what works and improve outcomes for disadvantaged communities. The Community Outcomes Fund invests in these next generation public-private partnerships that leverage private dollars to fund the delivery of high-impact services, where investors are repaid with a return based on the program achieving agreed upon outcomes. At the local level, the Fund's investments are driving dollars into evidence-based services that measurably improve economic, social, educational, and health outcomes in low-income communities. Nationally, the Fund's investments facilitate a meaningful shift in public policy to align funding with community outcomes.

Job Description

The Investment Analyst for The Community Outcomes Fund will be primarily responsible for supporting all aspects of the investment process.

Responsibilities include:

- *Investment Structuring* – Build financial model and conduct sensitivity analysis.
- *Due Diligence* – Assist with investment diligence of social service models and providers, including quantitative data on historical performance and impact, and qualitative assessments of evidence-based programs.
- *Portfolio Management* – Monitor investments in Fund portfolio, coordinate investment reporting, and other aspects of portfolio management. Assist in investor relations efforts to communicate portfolio information to LPs.
- *Pipeline Management* – Track investment opportunities and manage relationships with key pipeline partners.

Qualifications

The ideal candidate will possess the following:

- Bachelor's degree in relevant major.
- 1-3 years' experience as financial / investment analyst (preference for experience in a formal analyst training program) or comparable quantitative training and experience in consulting.
- Positive attitude and empathetic disposition; drive to do work in service of others.
- Excellent understanding of and ability to create and control complex Excel-based financial models and Powerpoint presentations.
- Keen interest in impact investing, evidence-based policy, community development and/or public-private partnerships; experience is a plus but not expected.
- Ability to travel as needed for diligence of investment opportunities and asset management of existing investments.
- Ability to work independently and communicate with external partners.

- Commitment to a collegial workplace and the flexibility and drive to thrive in an evolving start-up environment.

Benefits

- Competitive benefits
- Salary will be commensurate with experience
